

# debian

## GNU/Linux 4.0 "Etch"

Default desktop environment

GNOME is the default desktop environment and is contained on the first CD of the full 21-CD-set. The KDE desktop environment (KDE) and the Xfce desktop are not included on the first CD. They can be installed through two new alternative CD images.

Use this CD to install Debian GNU/Linux 4.0 with a default Xfce desktop.

<http://www.debian.org>

This release introduces a newly developed graphical frontend to the installation system supporting scripts using composed characters and complex languages; the installation system for Debian GNU/Linux has now been translated to 58 languages.

The graphical installer has to be booted using expertgui and rescuegui instead of install. Analogous, the expert and rescue modes are booted using expertgui and rescuegui respectively.

### Installation

Debian GNU/Linux is a free operating system, developed by more than thousand volunteers from all over the world who collaborate via the Internet. Debian's dedication to Free Software, its non-profit nature, and its open development model make it unique among GNU/Linux distributions.

The Debian project's key strengths are its volunteer base, its dedication to the Debian Social Contract, and its commitment to provide the best operating system possible. Debian 4.0 is another important step in that direction.
