GNU/Linux 4.0 "Etch"

CD — K Desktop Environment

> you are free
> to run the program, for any purpose.
> to study how the program works,
> and adapt it to your needs.
> to redistribute copies so you can help your neighbor.
> to improve the program, and release your improvements
> to the public, so that the whole community benefits.

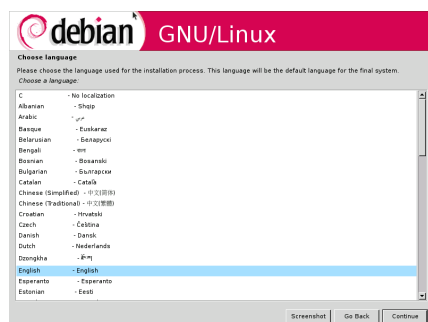

About Debian

Debian GNU/Linux is a free operating system, developed by more than a thousand volunteers from all over the world who collaborate via the Internet. Debian's dedication to Free Software, its non-profit nature, and its open development model make it unique among GNU/Linux distributions.

The Debian project's key strengths are its volunteer base, its dedication to the Debian Social Contract, and its commitment to provide the best operating system possible. Debian 4.0 is another important step in that direction.

Installation

This release introduces a newly developed graphical frontend to the installation system supporting scripts using composed characters and complex languages; the installation system for Debian GNU/Linux has now been translated to 58 languages.

The graphical installer has to be booted using installgui instead of install. Analogous, the expert and rescue modes are booted using expertgui and rescuegui respectively.

Default desktop environment

GNOME is the default desktop environment and is contained on the first CD of the full 21-CD-set. The K Desktop Environment (KDE) and the Xfce desktop are not included on the first CD. They can be installed through two new alternative CD images.

Use this CD to install Debian GNU/Linux 4.0 with a default KDE desktop.
